

Ultra

Fellert's Premium System is named Ultra. This product's surface structure is remarkably smooth, in principle like a gypsum board.

Apart from that the surface structure is "painted"; Fellert Ultra has the same properties as Fellert Alpha. The Ultra is entirely independent of exterior conditions regarding sound absorption, and it could be shaped into vaults, cross-vaults, arches etc. and be painted in optional colour within the NCS-, or RAL-scale.

Surface structure:

The Ultra is available in the following surface structure. Please observe that the photo is taken in ca X2 enlargement, and that it also has a slightly grey shade. In the original photo it is completely white.

Surface structure: Ultra

Certificate:

Click on the links below to download the documents in PDF-format.

- Emission, VOC
- Firecertificate (SWE)
- Firecertificate (ENG)
- ASTM E-84 Fellert Alpha
- ASTM E-84 Fellert Ultra
